

The choice of renowned sailmakers

PROFESSIONAL

METICULOUS

MANUAL

PERFECT

Since 2014 we have developed the perfect combination between products - special for sails and nautical fabrics - and the use of meticulous manual processes, to get sails and covers clean from mold, moisture, salt, dirt and algae, having gained the preference of renowned sailmakers and end-users

Our process is fully manual, to protect the sail tissue tension and strength and deliver exceptional results

After inspection, sails and covers go through a series of steps, between soaking and manual brushing ending with rinsing and drying. Sails can also be coated for extra protection and performance

The sprayhoods, biminis and covers also go through the waterproofing process

At the end, sails and covers are delivered perfectly clean, dry and folded. Ready to store or use

Sail Washing

Sprayhood and Bimini Cleaning and Waterproofing

PICKING

Bring your sails to the nearest partner,
or call them for collection

Or ship them directly to us, with our
worldwide express courier provider

INSPECTION

Upon arrival, all goods are checked
and any damage registered and
photographed, and that information
sent to customer or partner

CLEANING & DRYING

The sails and covers are manually
washed over a series of immersion
and cleaning steps and are left to dry
completely before packing

COATING

After cleaning, sprayhoods and biminis
are coated to be waterproof
Sails can also be coated for extra
protection and shape regeneration

RETURN

The goods are now ready to be
shipped to our partner, for delivery
or sent directly to your address or
delivered at your boat
